📍 Visakhapatnam, AP

Professional Summary

Final-year B.Tech CSE student at **ANITS** with practical experience building fault-tolerant backend systems using **Java** and **Spring Boot**. Delivered two production-style projects focusing on reliability patterns (retry logic, idempotency) and secure API design. Strong foundation in **OOP**, **DBMS**, **OS**, and **Computer Networks**. Ready to contribute to backend and full-stack engineering teams from day one.

Technologies

Languages: Java (primary), Python, JavaScript, SQL
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Maven
Database: PostgreSQL, MySQL
Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)
Tools & Platforms: Git, GitHub, Postman, Vercel, Render
Concepts: OOP, SOLID Principles, REST Design, MVC Architecture, DBMS, OS, Computer Networks
Soft Skills: Problem Solving, Communication, Team Collaboration, Quick Learning, Time Management

Projects

Self-Healing Order Management System

[GitHub](#) 

- Engineered a fault-tolerant order processing backend in **Java** and **Spring Boot** implementing exponential backoff retry (3 attempts, 2× delay) and idempotency keys, eliminating duplicate transaction processing in concurrent load scenarios.
- Designed RESTful order lifecycle APIs (Create → Process → Confirm → Cancel) with **Spring MVC**, **Spring Data JPA**, and global exception handling; validated via Postman with 20+ test cases covering edge cases and error flows.

Image Steganography Application

[Github](#) 

- Built a **Spring Boot** REST API for bidirectional **LSB steganography** with **AES-256** password-gated encryption, supporting payloads up to 512KB in PNG images with zero perceptible quality loss.
- Implemented stateless API design with input validation, custom exception handling, and a **React.js** frontend for encode/decode operations; validated with 15+ Postman test cases covering edge cases.
- Applied secure coding practices including byte-level input sanitization and password-salted key derivation; API documentation exposed via **Swagger UI** (live on Render).

Education

Anil Neerukonda Institute of Technology and Sciences (ANITS)

2023 – 2027

B.Tech in Computer Science Engineering

- CGPA:** 8.9 / 10 **Current:** 4th Year (7th Semester)
- Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Sri Chaitanya Junior College

2021 – 2023

Intermediate (MPC) — Score: 98%

Internship & Certifications

Web Development Intern – VaultofCodes

Jun 2025 – Aug 2025

- Built and deployed 4 responsive web pages using **HTML**, **CSS**, and **JavaScript**; integrated a contact form backed by a **REST API** endpoint with server-side validation, reducing invalid form submissions by ~60%.

Certifications: Java – NPTEL | Full Stack Development – [Provider]
